(Today's Date)

## ORDERING:

Because every sign and order is different, there is no standard "Form" for ordering. To make a sign order, send us an email or letter including the following.

1. A sketch (or description in words) showing the typical layout of your signs, indicating the relative size of each line and where italics or capital letters are desired. Every customer's orders are individualized with the text and layout you want.
2. The number of signs in this order.
3. The size and color of the sign plates you are ordering.
4. The type of stake mounting system desired, A or B (if any), or whether holes or rounded corners are wanted.
5. An Excel file or Word document showing the text you want on each sign in the following sample format (each row for a separate sign):

**Column 1** shows what you want on the top line of each sign

**Column 2** shows what you want on the 2nd line

**Column 3** shows what you want on the lower left or bottom line

**Column 4** shows what you want on the lower right corner (if applicable)

When entering your data, if you want a particular line in italics, type the words in italics, or if you want a line in all Capital letters, type them in all capital letters. When typing scientific names, the Genus should start with a capital letter, with all the letters in the species in all lower case letters. When typing Common Names, the first letter of each common name word should be capitalized.

Indicate how you will be paying for your order. We accept checks, VISA, MasterCard, American Express, PayPal and Venmo, and purchase orders. **To pay by credit card, please call** with your account number, name on card, expiration date and security code, card billing address, along with the total amount of your order. Do not email credit card information. When ordering by email, please ask for a return email confirming receipt of the order.

Established 1996

*All signs guaranteed for one year.*

# High Quality Plant Identification Signs

- Our signs are used for permanently identifying plants and are suitable for heavy-duty, commercial outdoor use by botanical gardens, zoos, hotels, malls, colleges, private growers/collectors, nurseries, amusement parks, golf courses, public parks, resorts, etc.
- Signs are made of heavy-duty 1/8" thick laminated UV- and weather-resistant, outdoor-rated plastic material.
- Colors available are: **Black** (mildly textured surface) with white letters, **White** (matte) with black letters, **Forest Green** (glossy surface) with white letters, **Apple Green** (matte surface) with white letters, and **Red** (matte surface) with white letters.
- We offer two different sign mounting systems. Both use galvanized steel, with a 30° bend at the top
  - A.** Attachment to heavy duty stakes with U-V resistant epoxy without a supporting back plate.
  - B.** Steel V-Style stakes with a steel plate with flanges on the sides and bottom, where the sign plate is inserted. These stakes have a point at the bottom, making inserting into the ground easier.
- Signs are engraved to your specifications with your text on our computerized engraving machine. Items that may be included on signs are genus, species, common name, family, origin or accession number. What to put on the signs is up to you.
- The fonts are scalable and may be *italicized*, engraved in all CAPITAL LETTERS or underlined if desired, to set various lines apart.
