## High Quality Plant Identification Signs

- Our signs are used for permanently identifying plants and are suitable for heavy-duty, commercial outdoor use by botanical gardens, zoos, hotels, malls, colleges, private growers/collectors, nurseries, amusement parks, golf courses, public parks, resorts, etc.
- Signs are made of heavy-duty 1/8" thick laminated UV- and weather-resistant, outdoor-rated plastic material.
- Colors available are: **Black** (mildly textured surface) with white letters, **White** (mildly textured surface) with black letters, **Forest Green** (glossy surface) with white letters, **Apple Green** (matte surface) with white letters, and **Red** (matte surface) with white letters.
- We offer two different sign mounting systems. All use galvanized steel, with a 30° bend at the top:  
**Frame Type Sign Support Holders** have a steel plate with flanges on the sides and bottom to hold the sign. Our stakes have a point at the bottom, making inserting into the ground easier. Our most popular stake.  
**Flat Plate Sign Support Holders** have a flat metal plate at the top of the stake where the customer attaches the sign plate using whatever method is desired.
- Signs are engraved to your specifications with your text on our computerized engraving machine. Items that may be included on signs are genus, species, common name, family, origin or accession number. What to put on the signs is up to you.
- The fonts are scalable and may be *italicized*, engraved in all CAPITAL LETTERS or underlined if desired, to set various lines apart.

different uses and applications  
for our signs.

- Signs and Support Holders are sold separately.
- Every sign is individually engraved to your specifications.

### ORDERING:

Because every sign and order is different,  
there is no standard "Form" for ordering.  
To make a sign order, send us an email or  
letter including the following.

1. A sketch (or description in words) showing the typical layout of your signs, indicating the relative size of each line and where italics or capital letters are desired. Every customer's orders are individualized with the text and layout you want.
2. The number of signs in this order.
3. The size and color of the sign plates you are ordering.
4. If sign support holders are wanted, indicate whether frame or flat plate is wanted
5. An Excel file or Word document showing the text you want on each sign in the following sample format (each row for a separate sign):

**Column 1** shows what you want on the top line of each sign

**Column 2** shows what you want on the 2nd line

**Column 3** shows what you want on the lower left or bottom line

**Column 4** shows what you want on the lower right corner (if applicable)

When entering your data, if you want a particular line in italics, type the words in your list in italics, or if you want a line in all Capital letters, type them in all capital letters. When typing scientific names, the Genus should start with a capital letter, with all the letters in the species in all lower case letters. When typing Common Names, the first letter of each common name word should be capitalized.

Indicate how you will be paying for your order. We accept checks, VISA, MasterCard, American Express, Discover, PayPal, Venmo and purchase orders. **To pay by credit card, please call** with your account number, name on card, expiration date and security code, card billing address, along with the total amount of your order. **DO NOT email credit card information.** When ordering by email, please ask for a return email confirming receipt of the order.

**3% Discount if paying by check or ACH.**

## SIGN SUPPORT HOLDERS

We offer two sign support systems. The "Frame Support" holders have a frame riveted to the top of each stake that the sign slips into from the top. The top corners can be pinched with pliers to hold in the sign plate.

The "Flat Face" sign holders have a flat steel plate welded to the top of the stake, to which the customers attach their signs themselves using whatever method works best for them (pop rivets, 2-sided tape, epoxy, etc.). The support legs for both types are flat steel, folded vertically in a V for strength, with pointed bottoms for ease of inserting into the ground. The legs come in various lengths from 6" and up.

## SIGN HOLDER COMPARISONS

### FRAME STYLE SUPPORT HOLDERS:

- Maximum protection of sign plate from mechanical damage
- Can be re-used if plant dies
- Our sturdiest, most popular mounting system

This galvanized steel sign holder has a metal frame at the top designed to hold our 1/8" thick signs. Your sign slips in from the top, and can be held in place by pinching the top corners with a pair of pliers. Holders weigh 1/2 lb. to 1 lb. each.

### FLAT PLATE STYLE HOLDERS:

- No frame around sign to distract
- User attaches signs using own mounting method (epoxy, 2-sided tape, pop-rivets, etc.)
- Metal plate behind sign protects from mechanical damage
- Can be re-used if plant dies

### IF NO SUPPORT HOLDERS WANTED:

- User can attach sign to any surface or locally obtained stake or post as desired
- Holes can be drilled for hanging by wire or other method

Signs & support holders are sold separately.

Sign holders are sold separately from signs.
